Full-Stack Developer specializing in web applications, AI-powered automation, e-commerce and digital transformation. Builds custom platforms, integrates CRM systems and optimizes business workflows. Also supports teams in adopting generative AI (Claude training and Skills).

Skills

- Languages: JavaScript, Python, Java, C#, PHP, HTML, CSS
- Frameworks and tools: React.js, Node.js, ASP.NET, Vite
- E-commerce and CMS: PrestaShop, WordPress, Shopify
- Databases: PostgreSQL, MSSQL
- AI and automation: Claude (Skills, training), Make, workflow automation, AI content generation
- Domains: CRM integration, lead intelligence, business process automation

Professional Experience

Full-Stack Developer & Digital Solutions – SIMTIS

Casablanca | 2026 – Present

- Designed and built SoftTech Lead Intelligence (SLI), a lead generation and qualification application integrated with the CRM: prospect and contact identification, plus tracking of the sales teams' daily activity.
- Led the group-wide AI training program (Claude): shared sessions, department-specific workshops, and custom Skills created from each department's needs assessment.
- Developed and maintained e-commerce websites on PrestaShop and WordPress: custom modules, new features, updates and ongoing support.
- Led the complete redesign of a multilingual PrestaShop website: new theme and user experience, custom back-office modules, daily maintenance and security.
- Led SEO optimization of a PrestaShop website: moved it from page 10 of Google to page 1 in French, then to page 1 in all 3 of the site's languages; ongoing SEO work with limited resources.
- Customized themes and websites and improved user experience (UX).
- Built AI automation workflows for content generation.
- Contributed to the SIMTIS promotional video (script, structure and communication content).

Technologies: PrestaShop, WordPress, React.js, Node.js, Make, Claude

Founder – M.A.G Store (Shopify store)

Casablanca | Personal project

- Built, developed and maintain a Shopify store focused on home comfort (cocooning), with delivery across Morocco and cash on delivery.
- Developed the brand's visual identity (logo, positioning).

Technologies: Shopify

Creator – VR Showroom (immersive real estate platform)

Casablanca | Personal project

- Designed and built a web-based immersive real estate showroom: project catalogue, interactive floor plans, 3D models, immersive walkthroughs and 360° panoramas.
- Integrated a built-in CRM: automatic lead scoring and assignment, sales pipeline, and analytics on visits and leads.

Technologies: React, Three.js, WebGL

Full-Stack Developer – SaaS Inventory Platform

Casablanca | Oct – Dec 2024

- Developed an inventory, order and sales management platform.
- Created dashboards and automated alerts.
- Improved business workflows through automation.

Technologies: React.js, Node.js, Vite, PostgreSQL

Web Developer – Responsive Business Website

Casablanca | Aug – Sep 2024

- Developed a multilingual, responsive website.
- Integrated analytics and social media tools.

Technologies: React.js, HTML, CSS, JavaScript
